Technical Information
For Macintosh PowerBook 145

Specifications

Processor
- 68030
  25 MHz clock frequency

Memory
- 4 MB pseudostatic RAM (2 MB on logic board, 2 MB on a memory expansion card); expandable to 8 MB
  1 MB ROM

Disk drives
- Internal 40 or 80 MB hard disk drive
- Built-in 1.4 MB floppy disk drive

Video display
- 640 x 400 backlit Supertwist (FSTN), monochrome

Main battery
- Rechargeable nickel cadmium battery
  2–3 hours of operation

Backup battery
- 30 mAh rechargeable lithium battery for clock chip

Sound generator
- 4-voice sound with 8-bit digital-analog conversion recording at 11 kHz or 22 kHz sample rate

Interfaces
- Apple Desktop Bus (ADB) port for keyboard, mouse, and other input devices using a low-speed, synchronous serial bus
- Two serial ports for printers, modems, and other serial devices (RS-422)
- SCSI port for hard disk drives, scanners, printers, and other devices (HDI-30 connector)
- Sound output port for external audio amplifier
- Sound input port for monaural sound input
Power adapter
- Input: AC100–240 V, 50/60 Hz
- Output: DC 7.5 V, 2.0 A

Note: The PowerBook 145 can be used at any input voltage within the range above, with no effect on performance.

Clock/calendar
- CMOS custom chip with long-life lithium battery

Keyboard
- 3.0 mm travel keyboard
  - 18 mm vertical pitch, 18.63 mm horizontal pitch

Trackball
- 30 mm diameter

Modem
- 2400-bps modem with fax send capability
- Supports MNP error correction and data compression classes 4 and 5, as well as CCITT v.32 and v.32bis

Weight
- 3.1 kg (6.8 lb.)

Dimensions
- 286 mm x 236 mm x 57 mm (11.25" x 9.3" x 2.25"")

Apple Desktop Bus power requirements
- Maximum current draw for all ADB devices is 200 mA

Note: The maximum number of ADB devices recommended in a daisy chain connected to the ADB port is three.
RAM configurations

- The 4 MB configuration of this model includes a 2 MB card that must be removed to expand memory. RAM chips must be rated at 100 ns access time or faster.

⚠️ Warning: Do not attempt to install additional RAM yourself. Doing so will void the warranty on your computer. See your authorized Apple dealer or service provider. ⚠️

Microphone/Sound

- The external microphone is an omnidirectional electret type that is powered by the computer. Microphone output voltage is 4 millivolts (mV) peak to peak at normal speaking volume.

❖ Note: You can also use adapters to input sound from audio equipment with line level outputs, but the line level signals must be attenuated before reaching the computer’s sound input port. An attenuation of 500:1 is recommended when inputting line level signals. Appropriate attenuation cables and adapters are available from most electronics stores. ❖
Environment

Operating temperature
- 10°C to 40°C (50°F to 104°F)

Storage temperature
- –25°C to 60°C (–13°F to 140°F)

Relative humidity
- 20% to 80% noncondensing

Altitude
- Operating: 3048 m (10,000 ft.) maximum
- Shipping (non-operating): 4572 m (15,000 ft.) maximum

Options and accessories

The following are available as options and accessories for your PowerBook computer.
